Career Objective:

Results-driven Software QA Engineer with **4 years** of experience in manual, automation, and performance testing across SaaS products and client-based projects. Currently the dedicated QA owner for a live pharmacy management product and two SaaS MVPs, contributing from requirement analysis through release. Skilled in test planning, UI/UX validation, API and load testing, defect tracking, and Agile collaboration, with hands-on automation in Playwright (Python) and Selenium (Python).

Experience:

Software QA Engineer | Zaag Systems Ltd., Dhaka

March 2025 – Present

- Serve as the dedicated QA engineer for ZAAG's product portfolio — **OS Pharmacy**, a live pharmacy management product with **200+** active users on web, plus two SaaS MVPs, **Zaagshop** (~1,500 users and 50 paid subscribers) and **ZaagAI** (RAG-based AI chatbot) — ensuring quality throughout new development and every release.
- Own end-to-end QA for the **OS Pharmacy** mobile apps, published on Google Play (**5K+ installs**) and the Apple App Store, covering functional, compatibility, and release-candidate testing for every store update.
- Perform functional, UI/UX, and non-functional testing across multiple concurrent projects following Agile methodology.
- Contribute from the planning and requirement-analysis phase for **Zaagshop** and **ZaagAI**, shaping test strategy, test planning, and quality assurance across the development lifecycle.
- Report and track defects in Jira, collaborating closely with developers to drive quick resolution.
- Support sprint management as Scrum Master / Associate Project Manager (**APM**), facilitating sprint planning, daily standups, and retrospectives.

Software QA Engineer | Continental Technologies (BD) Limited, Dhaka

Sept 2022 – Feb 2025

- Created and maintained comprehensive test plans and test cases for the **Payroll** and **ERP** platforms, demonstrating deep understanding of the systems under test.
- Conducted manual, functional, and non-functional testing, including unit, integration, ad-hoc, and compatibility testing.
- Developed automation scripts for retesting and regression testing using the Page Object Model (POM) in Playwright.

Key Achievements:

- **Leading Quality Assurance for SaaS Products:** led QA for multiple SaaS products from MVP through release, ensuring high-quality launches and contributing throughout the development lifecycle.

Skills:

Manual Testing: Functional, Regression, Smoke, Sanity, UAT; test case design and review, test execution and evaluation, defect reporting, test report creation

Automation: Playwright (Python, Page Object Model), Selenium (Python), UI Automator

API & Performance Testing: Postman / Newman, JMeter / BlazeMeter

Security Testing: Acunetix, Burp Suite

Database: MySQL (queries, data manipulation)

Programming Languages: Python, C

Agile Methodology: Jira, Trello, Scrum ceremonies (planning, standups, retrospectives)

Version Control: GitHub / Bitbucket

Web Technologies: HTML, CSS, basic JavaScript

Key Products / Professional Projects:

- [OS Pharmacy](#) — Live pharmacy management product (web, Android, iOS) — dedicated QA owner; **200+** active users on web and **5K+** Google Play installs. [Google Play](#) | [App Store](#)
- [Zaagshop](#) — SaaS eCommerce website builder (MVP) — QA from requirement analysis through release; ~1,500 users and 50 paid subscribers.
- [ZaagAI](#) — AI chatbot (MVP) built on a Retrieval-Augmented Generation (RAG) architecture.
- [Apex Footwear Limited](#) — Corporate portfolio website — functional and compatibility testing.
- [SwitchNest](#) — UK platform for updating an address with multiple organizations in one place.
- [Northern Handicraft](#) — eCommerce platform for sustainable handmade products crafted by artisans from natural materials.
- [Go Global](#) — Marketplace connecting high-quality freelancers with companies that value excellence.

Automation Testing

- CURA Healthcare Service appointment module — end-to-end booking flow automated.
- ParaBank registration, login, and home-page flows automated using the Page Object Model.
github.com/Tuhingits/Selenium_python_Automation_Project

API Testing

- API test cases built as Postman collections with reusable environments.
- Collection and environment executed via Newman in CLI, generating HTML reports.
github.com/Tuhingits/API-Testing-Project

Performance Testing

- Load and stress testing of the Prostate Cancer UK chatbot using JMeter and BlazeMeter.
