PROFESSIONAL SUMMARY

Software QA Engineer with 4+ years of hands-on experience in manual testing, test automation, API testing, and performance testing across SaaS products and client-based web and mobile applications. Currently the dedicated QA owner for a live pharmacy management platform (Web, Android, iOS) and two SaaS MVPs, contributing across the full SDLC/STLC from requirement analysis and test planning through execution, defect management, and release sign-off. Skilled in test strategy, test case design, regression and cross-browser testing, UI/UX validation, and API and load testing, with automation experience in Playwright (Python, Page Object Model) and Selenium WebDriver. Works in Agile/Scrum teams using Jira and has served as Scrum Master / Associate Project Manager for sprint delivery.

CORE COMPETENCIES

Manual Testing | Test Automation | API Testing | Performance Testing | Mobile Application Testing | Agile / Scrum | SDLC & STLC | Test Planning & Test Strategy | Requirement Analysis | Test Case Design | Defect Life Cycle Management | Regression Testing | UAT | Release Management | Cross-Browser Testing

TECHNICAL SKILLS

Testing Types: Functional, Non-Functional, Regression, Smoke, Sanity, Retesting, Integration, System, End-to-End, Exploratory, Ad-hoc, Compatibility, Cross-Browser, Cross-Platform, Usability / UI-UX, User Acceptance Testing (UAT), Release Candidate Testing

Test Design Techniques: Black-Box Testing, Equivalence Partitioning, Boundary Value Analysis, Decision Table Testing, State Transition, Error Guessing, Requirement Traceability Matrix (RTM), Test Scenario & Test Case Design

Test Automation: Playwright (Python, Page Object Model), Selenium WebDriver (Python), UI Automator (Android), Automation Framework Design, Regression Suite Maintenance

API Testing: Postman, Newman (CLI execution with HTML reports), REST API, JSON, Collections, Environments, Request Chaining, Response Validation

Performance Testing: Apache JMeter, BlazeMeter, Load Testing, Stress Testing, Response Time & Throughput Analysis

Security Testing: Acunetix, Burp Suite, Vulnerability Scanning

Mobile Testing: Android & iOS Application Testing, Google Play Store & Apple App Store Release Testing, Device / OS Compatibility Testing

Database: MySQL, SQL Queries, Data Validation, Data Manipulation

Programming: Python, C, JavaScript (basic), HTML, CSS

Tools & Process: Jira, Trello, Scrum Ceremonies (Sprint Planning, Daily Stand-up, Sprint Review, Retrospective), Kanban, Browser Developer Tools

Version Control: Git, GitHub, Bitbucket

PROFESSIONAL EXPERIENCE

Software QA Engineer

Zaag Systems Ltd. | Dhaka, Bangladesh | March 2025 - Present

- Serve as the dedicated QA engineer for the entire ZAAG product portfolio, covering OS Pharmacy (live pharmacy management platform with 200+ active web users), Zaagshop (SaaS eCommerce website builder with ~1,500 users and 50 paid subscribers), and ZaagAI (Retrieval-Augmented Generation AI chatbot).
- Own end-to-end QA for the OS Pharmacy Android and iOS applications, published on Google Play (5,000+ installs) and the Apple App Store, executing functional, compatibility, and release-candidate testing for every store release.
- Drive quality for two SaaS MVPs from the requirement analysis phase through release, defining test strategy, writing test plans and test cases, and providing go/no-go release sign-off.
- Perform functional, UI/UX, and non-functional testing across multiple concurrent projects in an Agile/Scrum delivery environment.
- Report, prioritize, and track defects in Jira through the full defect life cycle, collaborating directly with developers to accelerate resolution and prevent regressions reaching production.
- Design and maintain reusable regression suites so each release is validated consistently across web and mobile platforms.
- Act as Scrum Master / Associate Project Manager (APM), running sprint planning, daily stand-ups, backlog grooming, and retrospectives.

Software QA Engineer

Continental Technologies (BD) Limited | Dhaka, Bangladesh | September 2022 - February 2025

- Created and maintained comprehensive test plans, test scenarios, and test cases for enterprise Payroll and ERP platforms, building deep domain knowledge of the systems under test.
- Conducted manual functional and non-functional testing, including unit, integration, ad-hoc, regression, and compatibility testing across supported browsers and configurations.
- Developed and maintained automation scripts for retesting and regression testing using the Page Object Model (POM) in Playwright, reducing repetitive manual regression effort each release.
- Validated back-end data integrity by running MySQL queries against application output to confirm payroll and ERP calculations matched expected results.
- Logged, reproduced, and tracked defects to closure, and produced test summary reports to communicate release readiness to stakeholders.

KEY PROJECTS

Products - Zaag Systems Ltd.

- **OS Pharmacy** - Pharmacy management platform (Web, Android, iOS). Dedicated QA owner; 200+ active web users and 5,000+ Google Play installs. Full functional, compatibility, and release testing on both app stores.
- **Zaagshop** - SaaS eCommerce website builder (MVP). QA from requirement analysis through release; ~1,500 users and 50 paid subscribers.
- **ZaagAI** - AI chatbot (MVP) built on a Retrieval-Augmented Generation (RAG) architecture; validated response accuracy, conversation flows, and integration behavior.

Client Projects

- **Apex Footwear Limited** - Corporate portfolio website; functional and compatibility testing.
- **SwitchNest** - UK platform for updating an address across multiple organizations in one place.
- **Northern Handicraft** - eCommerce platform for sustainable handmade products crafted from natural materials.
- **Go Global** - Marketplace connecting high-quality freelancers with companies that value excellence.

Portfolio / Practice Projects

- **Automation Testing (Selenium, Python)** - Automated the CURA Healthcare Service appointment-booking flow end to end, plus ParaBank registration, login, and home-page flows using the Page Object Model. github.com/Tuhingits/Selenium_python_Automation_Project
- **API Testing (Postman, Newman)** - Built API test cases as Postman collections with reusable environments and executed them via Newman in the CLI to generate HTML test reports. github.com/Tuhingits/API-Testing-Project
- **Performance Testing (JMeter, BlazeMeter)** - Load and stress testing of the Prostate Cancer UK chatbot, analyzing response time and throughput under concurrent user load. github.com/Tuhingits/PerformanceTesting_on_PCUKchatbotchatbot

EDUCATION

BSc in Software Engineering | Daffodil International University, Dhaka, Bangladesh | 2021 | CGPA: 3.01

ADDITIONAL INFORMATION

- Ex-Member, Daffodil ISACA Student Group.
- Languages: Bengali (native), English (professional working proficiency).
